The helmet is made using the In-Mold technology with an aerodynamic profile. Comfort during long rides and races is enhanced with 20 ventilation openings for better airflow and comfort. The new adjustment system ensures a secure and comfortable fit with a head circumference regulator.

It features a thermopressed soft liner with an anti-insect mesh. Improved visibility and safety during low-light conditions are provided by the reflective stickers on the rear of the helmet. The helmet also includes a detachable visor for sun and wind protection.
